

One mobility account for all your commuting needs

Commuting needs are changing. To help you adjust, we are adding new shared mobility options integrated into one commuter account. Best of all, we will identify pre-tax eligible expenses, so your company and your employees continue to receive tax incentives and remain compliant with the IRS regulations.

Your Commute Your Choice

Along with traditional pre-tax options like public transit and parking, we are proud to offer the following new commuting options to choose from:

- **Biking**
- **Bike Sharing**
- **Scooter Rentals**
- **Corporate Shuttle Service**
- **Private Lyft rides**

How Does it Work?

- 1** Funds can be added to employees' commuter benefits accounts either by a company subsidy, or direct employee funding from their payroll.
- 2** Employees use that money to pay for the commute of their choice.
- 3** We'll take care of the rest! We will identify and manage all pre-tax eligible expenses.
